Problem 1305: All Elements in Two Binary Search Trees

Problem Information

Difficulty: Medium
Acceptance Rate: 0.00%
Paid Only: No

Problem Description

Given two binary search trees

root1

and

root2

, return

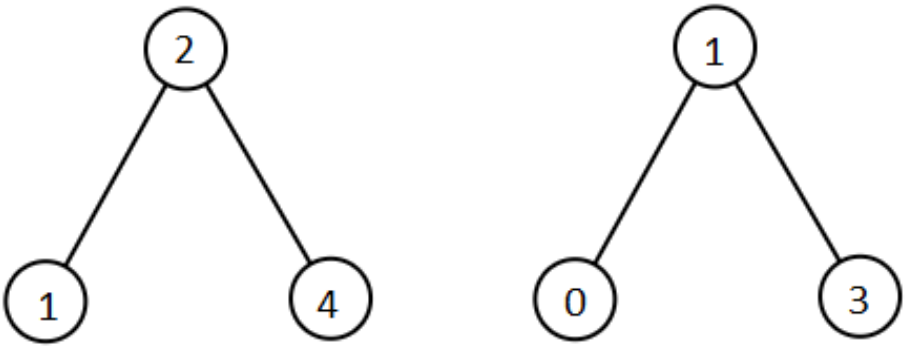
a list containing all the integers from both trees sorted in

ascending

order

.

Example 1:



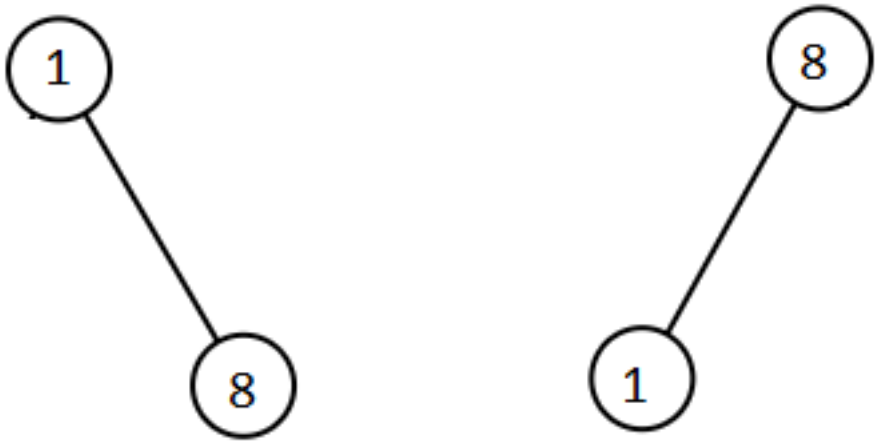
Input:

root1 = [2,1,4], root2 = [1,0,3]

Output:

[0,1,1,2,3,4]

Example 2:



Input:

root1 = [1,null,8], root2 = [8,1]

Output:

[1,1,8,8]

Constraints:

The number of nodes in each tree is in the range

[0, 5000]

.

-10

5

<= Node.val <= 10

5

Code Snippets

C++:

```
