# Problem 3157: Find the Level of Tree with Minimum Sum

## Problem Information

**Difficulty:** Medium
**Acceptance Rate:** 0.00%
**Paid Only:** No

## Problem Description

Given the root of a binary tree

root

where each node has a value, return the level of the tree that has the

minimum

sum of values among all the levels (in case of a tie, return the

lowest

level).

Note

that the root of the tree is at level 1 and the level of any other node is its distance from the root + 1.

Example 1:

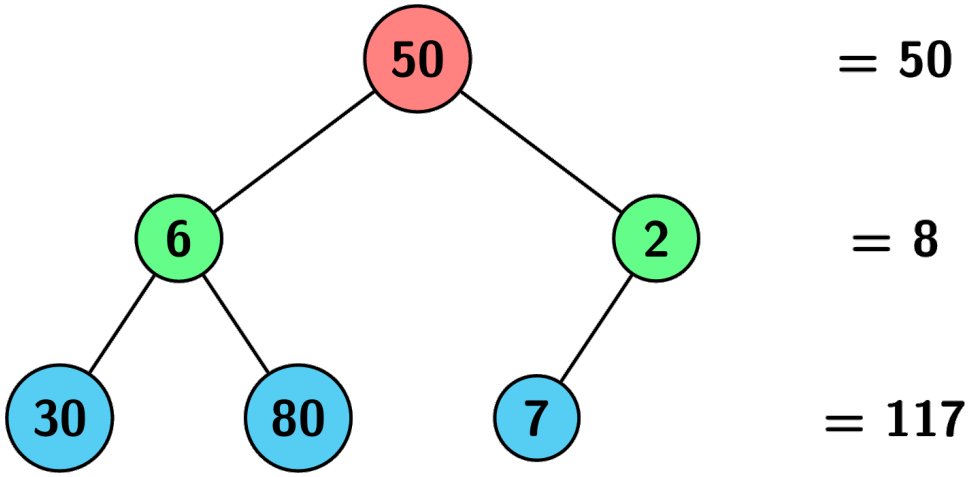
Input:

root = [50,6,2,30,80,7]

Output:

2

Explanation:



Example 2:

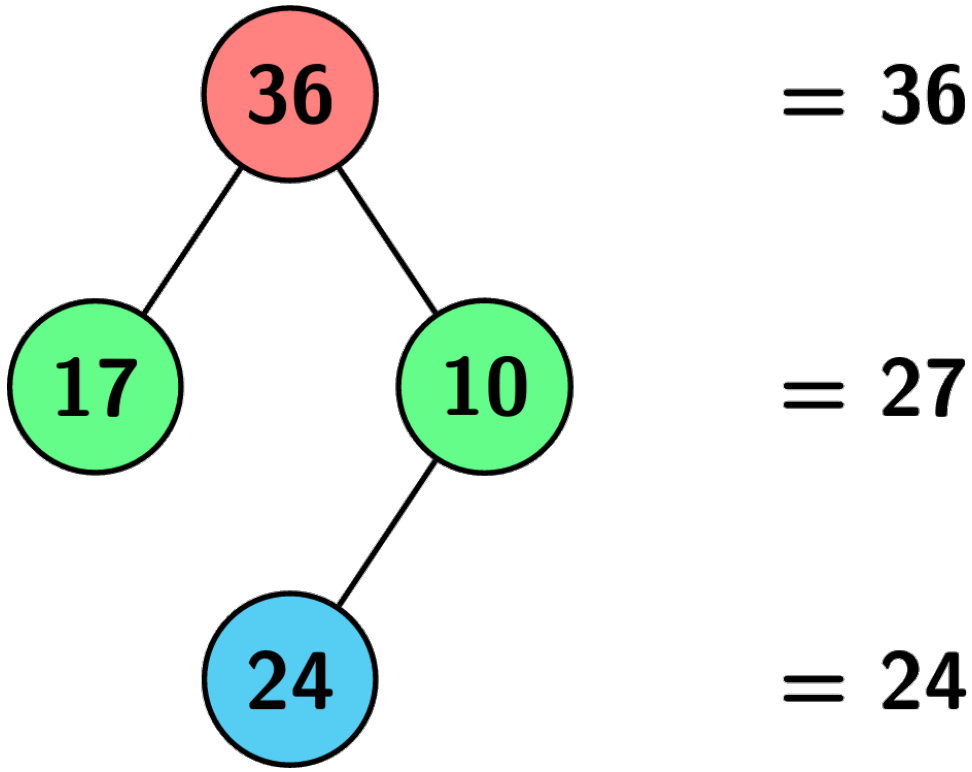
Input:

root = [36,17,10,null,null,24]

Output:

3

Explanation:



Example 3:

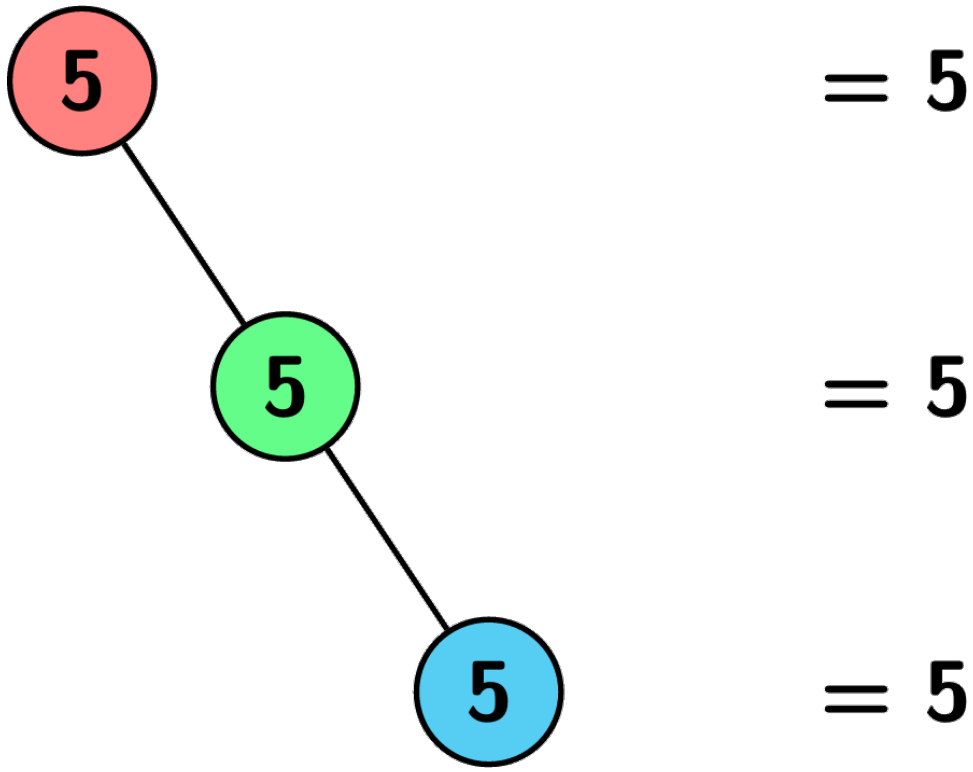
Input:

root = [5,null,5,null,5]

Output:

1

Explanation:



Constraints:

The number of nodes in the tree is in the range

[1, 10

5

]

.

1 <= Node.val <= 10
