Problem 637: Average of Levels in Binary Tree

Problem Information

Difficulty: Easy
Acceptance Rate: 0.00%
Paid Only: No

Problem Description

Given the

root

of a binary tree, return

the average value of the nodes on each level in the form of an array

. Answers within

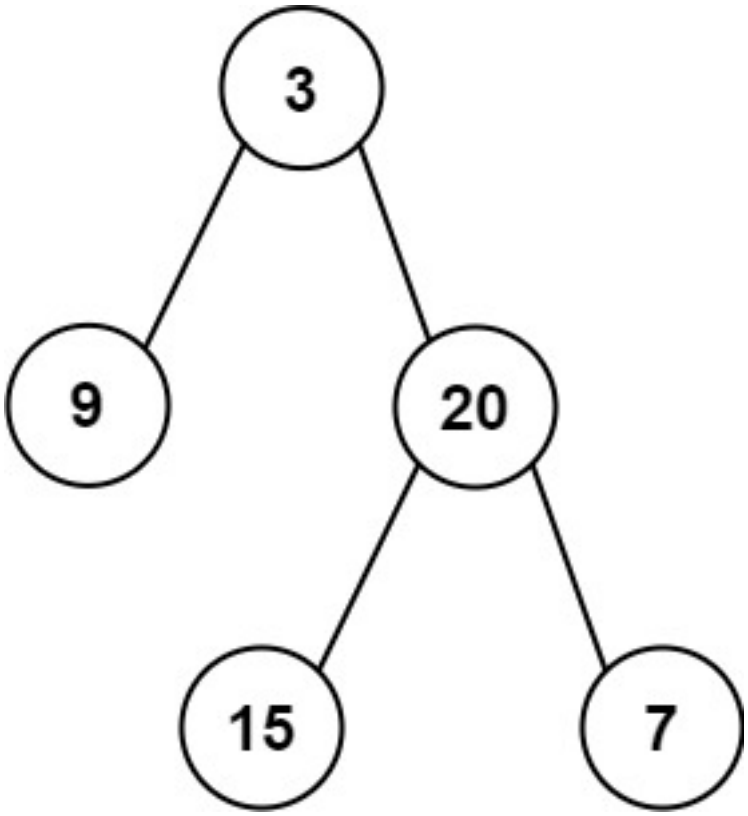
of the actual answer will be accepted.

Example 1:



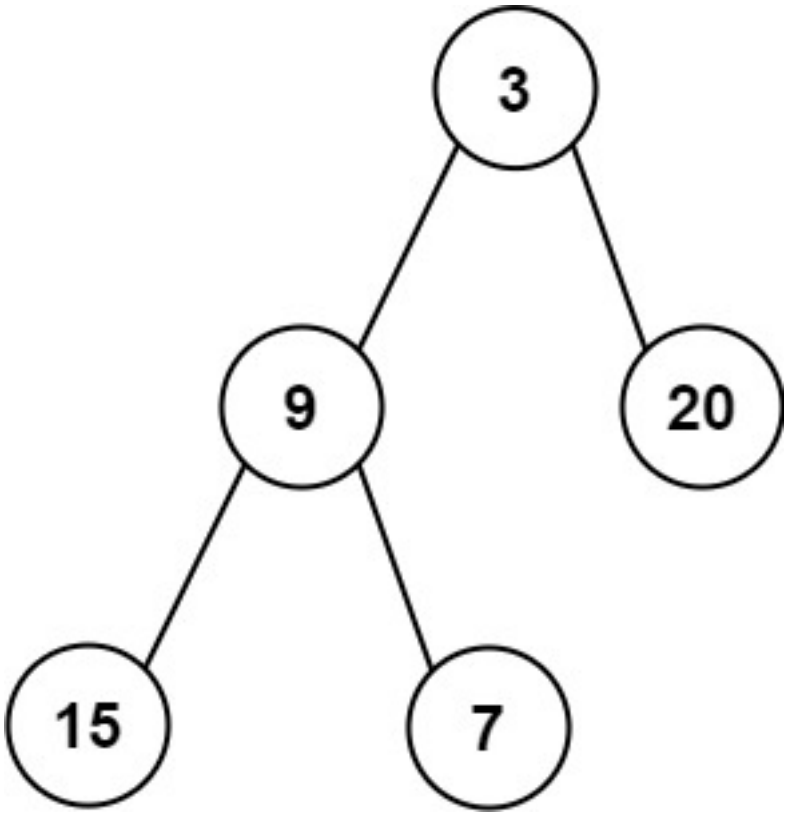
Input:

root = [3,9,20,null,null,15,7]

Output:

[3.00000,14.50000,11.00000] Explanation: The average value of nodes on level 0 is 3, on level 1 is 14.5, and on level 2 is 11. Hence return [3, 14.5, 11].

Example 2:



Input:

root = [3,9,20,15,7]

Output:

[3.00000,14.50000,11.00000]

Constraints:

The number of nodes in the tree is in the range

[1, 10

4

]

.
