Problem 1100: Find K-Length Substrings With No Repeated Characters

Problem Information

Difficulty: Medium
Acceptance Rate: 0.00%
Paid Only: No

Problem Description

Given a string

s

and an integer

k

, return

the number of substrings in

s

of length

k

with no repeated characters

.

Example 1:

Input:

s = "havefunonleetcode", k = 5

Output:

6

Explanation:

There are 6 substrings they are: 'havef','avefu','vefun','efuno','etcod','tcode'.

Example 2:

Input:

s = "home", k = 5

Output:

0

Explanation:

Notice k can be larger than the length of s. In this case, it is not possible to find any substring.

Constraints:

1 <= s.length <= 10

4

s

consists of lowercase English letters.

1 <= k <= 10
