Problem 369: Plus One Linked List

Problem Information

Difficulty: Medium
Acceptance Rate: 0.00%
Paid Only: No

Problem Description

Given a non-negative integer represented as a linked list of digits,

plus one to the integer

.

The digits are stored such that the most significant digit is at the

head

of the list.

Example 1:

Input:

head = [1,2,3]

Output:

[1,2,4]

Example 2:

Input:

head = [0]

Output:

[1]

Constraints:

The number of nodes in the linked list is in the range

[1, 100]

.

0 <= Node.val <= 9

The number represented by the linked list does not contain leading zeros except for the zero itself.
