

# Problem 3199: Count Triplets with Even XOR Set Bits I

## Problem Information

Difficulty: Easy

Acceptance Rate: 82.82%

Paid Only: Yes

Tags: Array, Bit Manipulation

## Problem Description

Given three integer arrays `a`, `b`, and `c`, return the number of triplets `(a[i], b[j], c[k])`, such that the bitwise `XOR` of the elements of each triplet has an **even** number of set bits.

**Example 1.**

**Input:** `a = [1], b = [2], c = [3]`

**Output:** 1

**Explanation:**

The only triplet is `(a[0], b[0], c[0])` and their `XOR` is: `1 XOR 2 XOR 3 = 002`.

**Example 2.**

**Input:** `a = [1,1], b = [2,3], c = [1,5]`

**Output:** 4

**Explanation:**

Consider these four triplets:

\* `(a[0], b[1], c[0]):`1 XOR 3 XOR 1 = 0112` \* `(a[1], b[1], c[0]):`1 XOR 3 XOR 1 = 0112` \*  
` (a[0], b[0], c[1]):`1 XOR 2 XOR 5 = 1102` \* `(a[1], b[0], c[1]):`1 XOR 2 XOR 5 = 1102`

**\*\*Constraints:\*\***

\* `1` <= a.length, b.length, c.length <= 100` \* `0` <= a[i], b[i], c[i] <= 100`

## Code Snippets

### C++:

```
class Solution {  
public:  
    int tripletCount(vector<int>& a, vector<int>& b, vector<int>& c) {  
  
    }  
};
```

### Java:

```
class Solution {  
    public int tripletCount(int[] a, int[] b, int[] c) {  
  
    }  
}
```

### Python3:

```
class Solution:  
    def tripletCount(self, a: List[int], b: List[int], c: List[int]) -> int:
```
