Problem 653: Two Sum IV - Input is a BST

Problem Information

Difficulty: Easy
Acceptance Rate: 0.00%
Paid Only: No

Problem Description

Given the

root

of a binary search tree and an integer

k

, return

true

if there exist two elements in the BST such that their sum is equal to

k

,

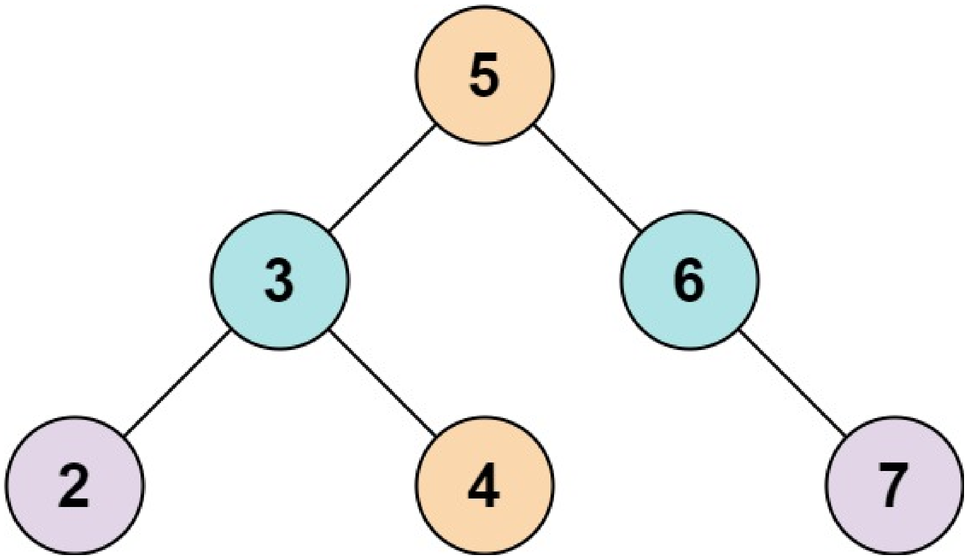
or

false

otherwise

.

Example 1:



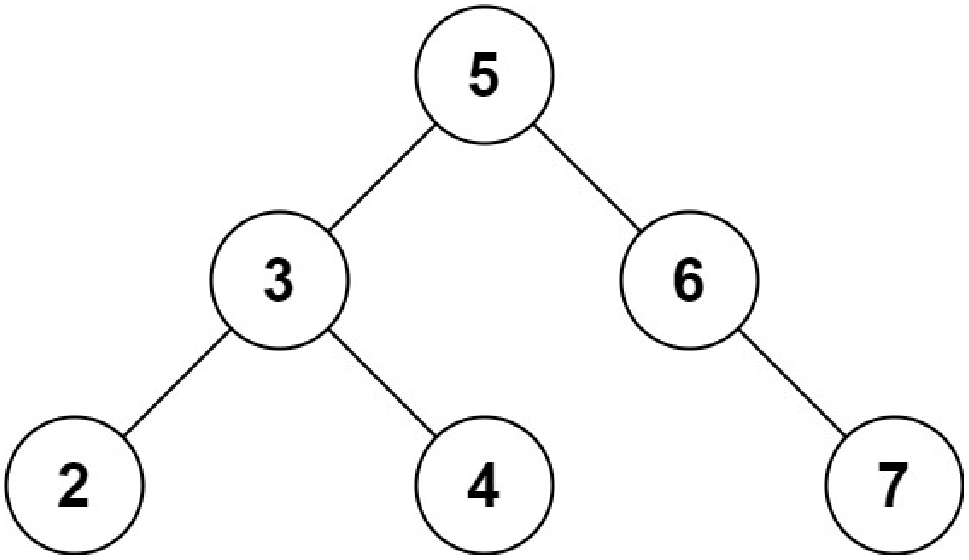
Input:

root = [5,3,6,2,4,null,7], k = 9

Output:

true

Example 2:



Input:

root = [5,3,6,2,4,null,7], k = 28

Output:

false

Constraints:

The number of nodes in the tree is in the range

[1, 10

4

]

.

-10

4

<= Node.val <= 10

4

root

is guaranteed to be a

valid

binary search tree.

-10

5

<= k <= 10
