Problem 95: Unique Binary Search Trees II

Problem Information

Difficulty: Medium
Acceptance Rate: 0.00%
Paid Only: No

Problem Description

Given an integer

n

, return

all the structurally unique

BST'

s (binary search trees), which has exactly

n

nodes of unique values from

1

to

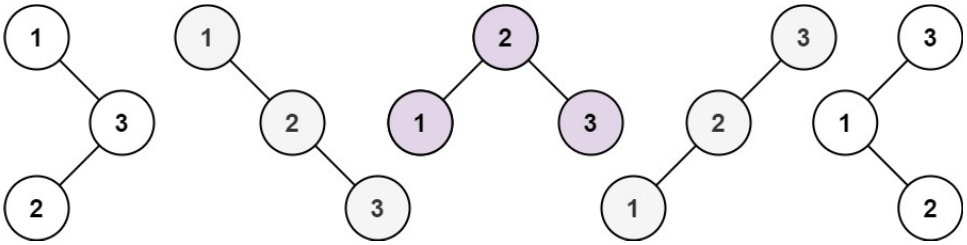
n

. Return the answer in

any order

.

Example 1:



Input:

n = 3

Output:

[[1,null,2,null,3],[1,null,3,2],[2,1,3],[3,1,null,null,2],[3,2,null,1]]

Example 2:

Input:

n = 1

Output:

[[1]]

Constraints:

1 <= n <= 8

Code Snippets

C++:

```
