Problem 234: Palindrome Linked List

Problem Information

Difficulty: Easy
Acceptance Rate: 0.00%
Paid Only: No

Problem Description

Given the

head

of a singly linked list, return

true

if it is a

palindrome

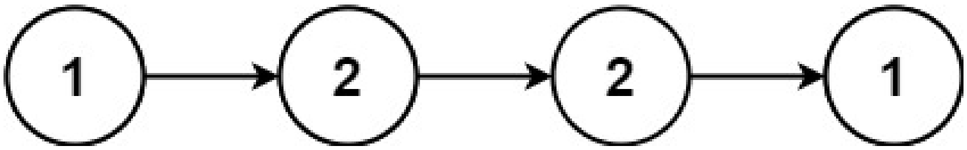
or

false

otherwise

.

Example 1:



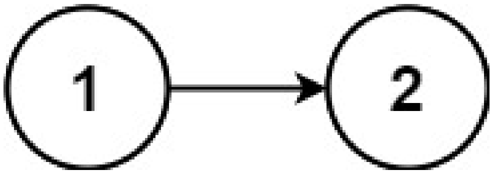
Input:

head = [1,2,2,1]

Output:

true

Example 2:



Input:

head = [1,2]

Output:

false

Constraints:

The number of nodes in the list is in the range

[1, 10

5

]

.

0 <= Node.val <= 9

Follow up:

Could you do it in

O(n)

time and

O(1)

space?
