Problem 103: Binary Tree Zigzag Level Order Traversal

Problem Information

Difficulty: Medium
Acceptance Rate: 0.00%
Paid Only: No

Problem Description

Given the

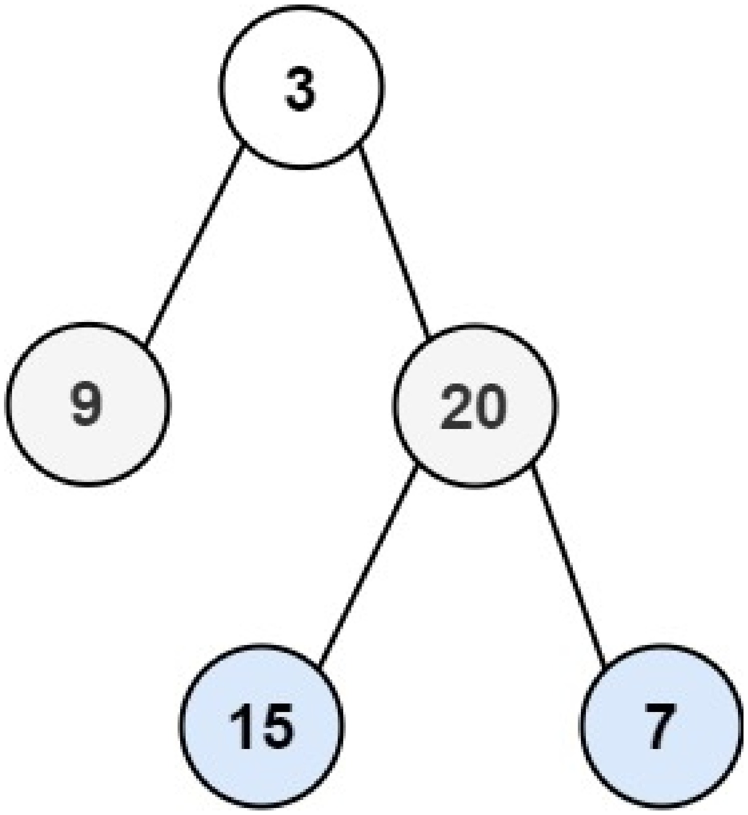
root

of a binary tree, return

the zigzag level order traversal of its nodes' values

. (i.e., from left to right, then right to left for the next level and alternate between).

Example 1:



Input:

root = [3,9,20,null,null,15,7]

Output:

[[3],[20,9],[15,7]]

Example 2:

Input:

root = [1]

Output:

[[1]]

Example 3:

Input:

root = []

Output:

[]

Constraints:

The number of nodes in the tree is in the range

[0, 2000]

.

-100 <= Node.val <= 100

Code Snippets

C++:

```
/**
* Definition for a binary tree node.
* struct TreeNode {
* int val;
