Problem 504: Base 7

Problem Information

Difficulty: Easy
Acceptance Rate: 53.21%
Paid Only: No
Tags: Math, String

Problem Description

Given an integer `num`, return _a string of its**base 7** representation_.

Example 1:

Input: num = 100 **Output:** "202"

Example 2:

Input: num = -7 **Output:** "-10"

Constraints:

* `-107 <= num <= 107`

Code Snippets

C++:

```
class Solution {
public:
string convertToBase7(int num) {

}
};
```

Java:

```java
class Solution {
public String convertToBase7(int num) {

}
}
```

Python3:

```python
class Solution:
def convertToBase7(self, num: int) -> str:
```
